

ESTIMATE WORKSHEET

Please fill out this worksheet and we will provide you a ballpark estimate. If the estimate is within your budget and you would like to proceed, let us know and we will schedule a site visit to take a final measure and finalize up the estimate.

For the DIY customer, we can provide parts only for your project. We recommend that you have at least some carpentry experience if you would like to install the railing yourself.

You may fill out this pdf form electronically, or print it. Once complete, please send in your quote request either by fax or email to the appropriate RailPro location.

PROJECT DETAILS

First we need a rough plan view diagram of your project. A hand sketch is fine, we just need to know:

- The length of the runs of rail (within a foot)
- The turns (are they 90 degrees or on an angle)
- If you have stairs
- If you can provide any pictures, this would be a great help

Service Type: Fully Installed Parts Only

Rail Type: Picket Glass
 Cable Topless Glass

Rail Height: 36" (Residential) 42" (Multi-Family)

Mounting Type: Surface Fascia (side mount)

Color: Black (standard) White (standard)
 Semi-Custom Color (adds 5% to order total)
 Custom Color (Virtual any color can be provided, cost varies by color)

Mounting Surface: Wood Composite
 Concrete Waterproof
 Tile

Rail Termination: On the Building With a Post

Is there any additional information you can provide us about your project that would help us in providing you with an accurate estimate?

PARTS-ONLY PROJECTS

For the DIY we can provide parts only orders. You are responsible for providing us with a good layout and we will help you call out the parts. It would be the same if you were building a deck and brought your drawings to the lumberyard. We will help you but will not normally do an on site visit. If you want us to measure your deck, there is a \$250 site visit charge.

Glass rail is a two-step process. Once the framework has been installed, you will measure the openings and send us the measurements. We then order the glass, which takes about 7 working days.

Please note that in most cases if you are planning to pick up the materials, you must have the ability to safely transport material that will be 20' in length. Please don't show up with a normal auto or SUV.

Parts only projects can be will called at our shop. We can deliver for a per trip fee of \$200.00, within a 20 mile radius of the RailPro location. Job sites further out will be quoted.

We want your project to go well, but please know it can be very difficult to answer questions over the phone. If you are at all unsure of your ability to install railing, we strongly suggest you consider having RailPro do the installation.

PLACING AN ORDER

Fully Installed Project

A 50% deposit, a signed copy of the estimate, and a signed layout drawing are required before orders are placed. There is currently about a 4 week lead time for installation projects.

Parts Only Project

Payment in full at the time of order is required along with a signed estimate and signed off drawings. You are fully responsible for the accuracy of the call out information. No returns are allowed for any custom part or color. Stock parts can be returned and are subject to a 20% restocking fee.

Thank you for your interest in RailPro for your project!
